

**AMENDMENTS TO THE ABSTRACT OF THE DISCLOSURE**

Please enter the following Abstract of the Disclosure in the record:

A coffee machine comprising a holder for receiving a coffee pad. The holder is provided with an opening for inserting a coffee, and at least one outlet, a carrier for receiving the holder and a holder cover which can cooperate with a sealing surface of the holder, such that a pressure chamber surrounding an inserted coffee pad can be formed. In order to reduce the production costs of the coffee machine and to maintain and/or improve operability, the holder is embodied as a single part.
